

TRACK THEIR SUCCESS.

DELIVERS

comprehensive database management for Kuder systems.

SERVES

educators, counselors, career advisors, policy makers, and other administrators.

PROVIDES

tools to access real-time data, generate reports, and meet accountability requirements.

Bring it all together with real data.

The **Kuder Administrative Database Management System** (ADMS) can be summed up in two simple words: virtual dashboard. Program managers get instant access to individual and group data, planning tools, and robust reporting — all with a few simple clicks.

Learn more at www.kuder.com.

FEATURES & BENEFITS

Streamlines

individual career guidance, curriculum and program planning, and workforce and economic development policy alignment.

Monitors

user progress to increase engagement, maximize results, and meet requirements.

Expedites

academic recruitment, retention, completion, and transition efforts.

Directs

communication between system users and administrators within multiple levels of access.

91%

of students said the Kuder system **provides hope for the future.**

Ensures

successful implementation with lesson plans, classroom curricula, parent resources, and more.

Organizes

multi-year education plans and course listings and facilitates individual plan review and approvals.

Includes

individual and aggregate data reporting with both pre-generated and custom options to address your specific needs.

Stores

critical user account information in a simple dashboard format and manages a multi-level structure for local, regional, and state or country reporting and security needs.

“The capability of school staff to **access results through the ADMS is invaluable**, not to mention the benefits of easily being able to communicate announcements with the students and their parents through this database!”

Wendy Maas

Dean of Students
Ottumwa High School
Ottumwa, Iowa
