Simplify the College & Career Planning Process

Kuder's career readiness systems are fully integrated with many third-party solutions to provide an intuitive, easy-to-use CCR platform for your district.

Our team is experienced in supporting integrations to ensure our products fit within your district's digital ecosystem. We are always looking to create new partnerships to continue enhancing our user experience and bring together everything that students need to prepare for the future in a single online platform.

✔ SSO Compatible

Kuder offers single sign-on (SSO) services with your SIS, LMS, or other district-managed portal systems to reduce frustrations over forgotten passwords or duplicate accounts and save valuable class time.

✔ SIS Support

We integrate with your district's student information system (SIS) to securely exchange data via API, scheduled SFTP, or direct file uploads. SIS integration offers student, educator, and parent/guardian account creation, deactivation, and makes updates quick and easy.

✔ Flexible Rostering

Rostering is managed through a direct file upload or a rostering integration service, like Clever or ClassLink. Kuder will roster your students based on graduation year and grade-level, which can then be used to create custom groups for administrators to streamline reporting.
